

Apex Cervical Orthosis Kit

Everything You Need in One Package!

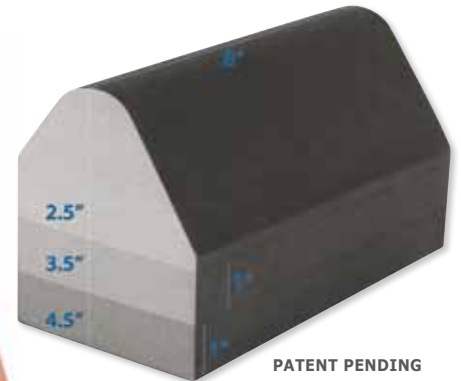

Promote Spinal Health

Many activities in modern daily living place the head in a detrimental forward head posture. The Apex Cervical Orthosis is an inexpensive yet effective tool to assist the health-care professional in restoring a patient's proper cervical posture. The Apex counters the negative forces caused by forward posture, and gently works to reverse kyphotic attitude when used daily under the supervision of a Health Care Professional. The Patent pending design of the Apex allows you to customize the height of the Apex by simply removing the precut, 1" sections from the bottom.

The Apex Cervical Orthosis Kit combines cold therapy with posture correction to assist in the restoration of cervical posture. The Soft Comfort CorPak can be cooled in the freezer and placed on the affected area to help reduce inflammation following use of the Apex. The soft, frost-free pack is gentle on skin and does not need to be wrapped in a towel. Filled with nontoxic, biodegradable fill, CorPaks are long lasting, reusable and retain cold longer than traditional packs.
