

FLEX-REST™ PLATFORM

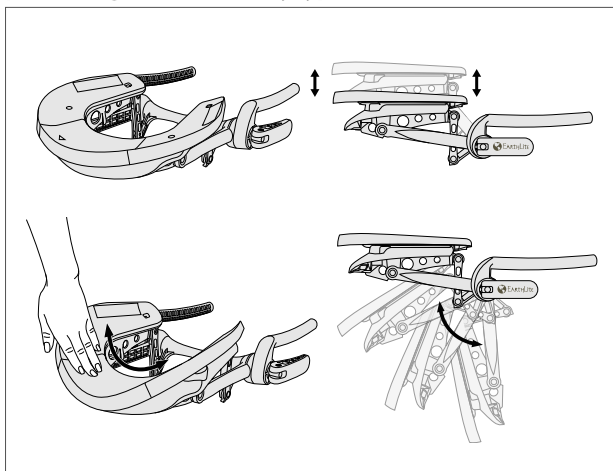

The revolutionary Flex-Rest™ self-adjusting platform flexes and pivots to adapt to the unique shape of your client's face. Sinus pressure is reduced and pressure points eliminated. The Flex-Rest's base has patented elastomeric connective tissue which flexes under pressure to create the optimal pivot point to suspend your client's face in a cradle of comfort. The dowels measure 8" on center to fit Earthlite tables.

Features:

- Patented elastomeric connective tissue flexes under pressure
- Single cam lever adjusts both height and angle, locks easily into place
- Reduces sinus pressure
- Eliminates pressure points
- Fits 8" on center outlets

Adjustments of both angle and height for perfect positioning of clients for any type of treatment.

Self-adjusting platform flexes and pivots to adapt to the unique shape of your client's face, providing ultimate client comfort

Folds compactly for convenient storage
