

PREvention[®]

NON-CIRCULATING FOOTBATH PROTOCOL

How to Clean & Disinfect Non-Circulating Footbaths with Prevention[™] Ready-to-Use Spray

1

Drain the water from the footbath basin and remove any visible debris.

Non-circulating or basin-style footbaths, do not have permanent jets or piping. They can be simply disinfected and do not require filling to the jet line with disinfectant. Saving you time and money.

2

Thoroughly clean the footbath and any removable jets/parts with Prevention or detergent, then rinse with water and drain.

3

Spray or foam Prevention on to the footbath and removable jets/parts.

Fast 1-minute contact time allows for quick turnaround between clients.

4

Allow to remain wet for **1 minute** to kill fungi, viruses & bacteria.

5

Rinse footbath basin with fresh water.
