

Paragon PC81 Ultra Violet (UV) Sanitizing Hot Towel Cabinet

The PC81 UV Sanitizing Hot Towel Cabinet is specifically engineered to help prevent the spread of bacteria and infection by disinfecting most spa and nail implements using a powerful, chemical-free Ultra Violet (UV) light that kills germs and bacteria on exposed surfaces. In addition to its sanitizing feature, the PC81 is also a full-function hot towel cabinet that can maintain treatment towels and stones at an average temperatures of 176°F. Simple to operation, each UV sanitizing cabinet comes complete with instrument/towel wire rack and long-lasting UV bulbs from Japan.

UV cabinets should be used as a supplement to and in conjunction with standard sterilization techniques as mandated and required by your local jurisdiction.

Model

Model Description	UV Sanitizing + Hot Towel Cabinet
Manufacturer	Garfield
Model Number	PC81

Specifications

Capacity	48
Case Construction	Metal, Double-Walled
Operating Temperature	158°F-176°F
